Network Adapter Constantly disconnecting  
2020/05/13

Recently my network adapter seems to disconnecting constantly. it either disconnects every 10mins or 1 min and has resulted in several BSOD.The adapter is the ASUS USB AC-56, Dual-band Wireless-AC1300 USB 3.0 Wi-Fi Adapter been using it for a year. Drivers are updated.The BSOD's experienced are: - Kernel security check failure- NNDS? forgot the name but it has to do with network driver, sorry for the lack of specificsI have tried:- Reinstalling the driver- Memory diagnostic tool- Changing power management of adapter settings to off- reset tcp/ip settings.Troubleshooting the network states that windows cannot automatically detect network's proxy settings. The network adapter is an external device plugged into the PC. Would really appreciate help on this! thanks!
